Module 21 - Bonus AI Prompt Library

Lesson 10: Codex Prompt for Bug Fixing Student PDF

WordPress, WooCommerce, Elementor এবং custom code issue safe way-তে analyze ও fix করার জন্য copy-ready Codex prompt library.

Class Topic

Codex Prompt for Bug Fixing

Use For

Plugin conflict, PHP error, Elementor, WooCommerce, CSS bug

Total Prompts

36 copy-ready debugging prompts

Best Tool

Codex, ChatGPT, Claude, Gemini

Prepared for AI + WordPress Ecommerce Full Course

এই PDF কীভাবে ব্যবহার করবেন

এই PDF-এর promptগুলো WordPress/WooCommerce website bug fix করার সময় ব্যবহার করতে পারবেন। প্রতিটি prompt copy করে Codex বা ChatGPT-তে paste করার আগে bracket-এর অংশগুলো নিজের project অনুযায়ী replace করুন। যেমন [Theme Name], [Affected Page], [Error Message], [Recent Changes] ইত্যাদি।

Goal

AI/Codex যেন problem আগে analyze করে, তারপর safe fixing method, testing checklist এবং rollback plan দেয়।

Safety Rule

Bug fix করার আগে backup নিন। WordPress core, WooCommerce core, Elementor core বা parent theme file edit করবেন না।

Prompt দেওয়ার আগে এই তথ্যগুলো ready রাখুন

- Website type: WordPress / WooCommerce / Elementor
- Affected page বা URL
- Error message, file path, line number
- Recent changes: plugin update, custom code, cache setup
- Expected result এবং actual result
- Backup আছে কি না এবং rollback method

Input	Example	Why Important
Problem Type	WooCommerce Checkout Issue	AI বুঝবে কোন area debug করতে হবে
Affected Page	Checkout Page	Fix specific এবং safe হবে
Recent Change	Cache plugin setting enabled	Root cause identify সহজ হবে
Error Message	Fatal error line 25	Exact file/line fix করা যায়
Safety Rule	Do not edit core files	Risk কমে এবং professional workflow থাকে

Good Debugging Prompt Formula

ভালো debugging prompt-এর formula হলো:

Error Type + Affected Page + Recent Changes + Expected Result + Actual Result + Error Message + Safety Rules + Testing Checklist + Rollback Plan

Important Reminder

AI/Codex solution দিলেই সরাসরি live site-এ apply করবেন না। আগে backup, তারপর staging/local test, তারপর live apply করুন। Ecommerce website হলে product -> cart -> checkout -> payment -> order received flow অবশ্যই test করুন।

এই PDF-তে থাকা prompt categories

1. Universal WordPress Bug Fixing Prompt
2. Backup + Safety Plan Before Fix Prompt
3. Plugin Conflict Fix Prompt
4. Theme Conflict Fix Prompt
5. Critical Error / White Screen Recovery Prompt
6. PHP Fatal Error Fix Prompt
7. CSS/Layout Issue Fix Prompt
8. Elementor Layout Broken Fix Prompt
9. Elementor Editor Not Loading Prompt
10. WooCommerce Checkout Issue Fix Prompt
11. WooCommerce Cart Empty / Cache Issue Prompt
12. Payment Method Missing Prompt
13. Shipping / Delivery Charge Wrong Prompt
14. Product Variation Add to Cart Issue Prompt
15. Single Product Page Broken Prompt
16. Thank You Page / Order Received Issue Prompt
17. WooCommerce Email Notification Issue Prompt
18. Custom Order Status Issue Prompt
19. My Account / Login Issue Prompt
20. 404 / Permalink Issue Fix Prompt
21. Speed / Cache Issue After Optimization Prompt
22. SSL / Mixed Content Issue Prompt
23. Contact Form Not Sending Prompt
24. WPCode / Code Snippet Error Prompt
25. Custom Plugin Error Debug Prompt
26. Child Theme functions.php Error Prompt
27. Migration / URL Replace Issue Prompt
28. Images Missing After Migration Prompt
29. Security / Malware Suspicious Issue Prompt
30. Debug Log Analysis Prompt
31. JavaScript Console Error Fix Prompt
32. Mobile Responsive Bug Fix Prompt
33. Header/Footer Broken Fix Prompt
34. Shortcode Not Working Prompt
35. Bug Fix Final QA Checklist Prompt
36. Codex Direct Bug Fix Prompt with Approval

01

Universal WordPress Bug Fixing Prompt

যেকোনো WordPress issue analyze করার জন্য

Universal / Safe Debugging

COPY-READY CODEX PROMPT

```
Act as a senior WordPress bug fixing expert.

Analyze my WordPress website issue step by step before suggesting any fix.

Website Details:
- Website Type: [WordPress / WooCommerce / Elementor]
- Theme: [Theme Name]
- Affected Page: [Page Name or URL]
- Problem Type: [Critical Error / CSS Issue / Plugin Conflict / WooCommerce Issue / PHP
Error]

Problem Details:
- Expected Result: [What should happen]
- Actual Result: [What is happening]
- Recent Changes: [Plugin update / Theme update / Custom code / Settings change]
- Error Message: [Paste full error if available]

Requirements:
1. Explain possible causes
2. Tell me what to check first
3. Give the safest fixing method
4. Do not edit WordPress core, WooCommerce core, or parent theme files
5. Do not change unrelated code
6. Give testing checklist
7. Give rollback plan

First analyze clearly. Do not provide code unless needed.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

02

Backup + Safety Plan Before Fix Prompt

Fix করার আগে safety plan নেওয়ার জন্য

Backup / Risk / Rollback

COPY-READY CODEX PROMPT

```
Act as a senior WordPress maintenance and bug fixing expert.

Before fixing my website issue, create a backup and safety plan.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: [Theme Name]
- Problem: [Explain issue]
- Affected Area: [Page / Plugin / Theme / Checkout / CSS]
- Recent Changes: [Explain]

Please provide:
1. What backup I should take first
2. Which files/settings may be affected
3. Risk level: Low / Medium / High
4. Safest fixing method
5. What not to edit
6. Rollback plan
7. Testing checklist after fixing

Important:
Do not provide code yet. First give me the safety plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

03

Plugin Conflict Fix Prompt

Plugin install/update করার পর issue হলে

Plugin Conflict / WooCommerce Safe

COPY-READY CODEX PROMPT

```
Act as a senior WordPress bug fixing expert.

My website may have a plugin conflict. Analyze the issue safely.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: Hello Elementor
- Affected Page: [Page Name or URL]
- Problem: [Explain what is broken]
- Recent Changes: [Installed/updated plugin names if known]
- Error Message: [Paste if available]

Please explain:
1. Possible plugin conflict causes
2. Which plugins I should check first
3. Safe one-by-one plugin testing workflow
4. How to test after each plugin deactivate/reactivate
5. What to do if a conflicting plugin is found
6. Final testing checklist
7. Rollback plan

Do not edit WordPress core, WooCommerce core, Elementor core, or parent theme files.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

04

Theme Conflict Fix Prompt

Theme update/change করার পর layout বা WooCommerce issue হলে

Theme / Child Theme / Safe Fix

COPY-READY CODEX PROMPT

```
Act as a senior WordPress theme debugging expert.

My website has a possible theme conflict issue.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Active Theme: [Theme Name]
- Child Theme: [Yes/No]
- Affected Page: [Page URL]
- Problem: [Explain issue]
- Recent Changes: [Theme update / Child theme code / Custom CSS]

Please analyze:
1. Possible theme conflict causes
2. What I should check first
3. Whether child theme/custom CSS may be involved
4. Safe fixing method without editing parent theme files
5. Testing checklist for homepage, product page, cart, checkout, and mobile view
6. Rollback plan

Do not edit WordPress core, WooCommerce core, or parent theme files.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

05

Critical Error / White Screen Recovery Prompt

Dashboard বা frontend critical error হলে

Critical Error / Recovery

COPY-READY CODEX PROMPT

```
Act as a senior WordPress recovery expert.

My WordPress website is showing a Critical Error or White Screen. Help me recover it
safely.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: [Theme Name]
- Error Type: Critical Error / White Screen
- Recent Changes: [Plugin update / Theme update / Custom code / New plugin]
- Error Message: [Paste full error if available]

Please provide:
1. Possible causes
2. First recovery steps
3. How to use WordPress Recovery Mode if email is available
4. How to disable a suspected plugin from File Manager/FTP
5. How to rename plugin/theme folder safely
6. How to read error log file path and line number
7. Testing checklist after recovery
8. Rollback plan

Do not edit core files or unrelated code.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

06

PHP Fatal Error Fix Prompt

functions.php, custom plugin, snippet error fix করার জন্য

PHP / Fatal Error / Line Number

COPY-READY CODEX PROMPT

```
Act as a senior WordPress PHP bug fixing expert.

I have a PHP error on my WordPress website. Analyze and fix it safely.

Error Message:
[Paste full PHP error]

File Path:
[Paste file path]

Line Number:
[Paste line number]

Recent Change:
[Explain what code/plugin/theme change happened before the error]

Requirements:
1. Explain the cause in beginner-friendly language
2. Tell me which line or code section is problematic
3. Provide only the fixed code section
4. Do not rewrite unrelated code
5. Do not edit WordPress core, WooCommerce core, Elementor core, or parent theme files
6. Explain how to test after fixing
7. Give rollback method if the fix fails.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

07

CSS/Layout Issue Fix Prompt

Button, card, spacing, mobile layout issue হলে

CSS / Scoped Fix / Responsive

COPY-READY CODEX PROMPT

```
Act as a senior WordPress CSS debugging expert.

I have a CSS/layout issue on my website.

Issue Details:
- Website Type: WordPress + Elementor + WooCommerce
- Affected Page: [Page URL]
- Device: [Desktop / Tablet / Mobile]
- Element: [Button / Header / Product Card / Checkout Form / Section]
- Current Problem: [What is broken]
- Expected Design: [What should happen]
- CSS Selector if known: [Paste selector]

Requirements:
1. Explain possible CSS cause
2. Provide scoped CSS only
3. Do not use global CSS that affects the whole website
4. Do not edit theme/core files
5. Make the fix responsive
6. Explain how to test on desktop, tablet, and mobile.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

08

Elementor Layout Broken Fix Prompt

Elementor page frontend broken বা mobile layout issue হলে

Elementor / Regenerate CSS

COPY-READY CODEX PROMPT

```
Act as a senior WordPress Elementor bug fixing expert.

My Elementor layout is broken. Analyze and fix it safely.

Website Details:
- Platform: WordPress + Elementor + WooCommerce
- Theme: Hello Elementor
- Affected Page: [Homepage / Product Page / Landing Page URL]
- Problem: [Spacing broken / columns misaligned / mobile layout broken / CSS not loading]
- Recent Changes: [Elementor edit / plugin update / custom CSS / cache setup]

Please explain:
1. Possible causes
2. What to check first in Elementor
3. Whether to regenerate CSS & Data
4. Cache/plugin conflict checks
5. Safe fix method
6. Desktop/tablet/mobile testing checklist
7. Rollback plan

Use scoped CSS only if needed. Do not edit core or parent theme files.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

09

Elementor Editor Not Loading Prompt

Elementor editor stuck/loading/error হলে

Elementor Editor / Plugin Conflict

COPY-READY CODEX PROMPT

```
Act as a senior Elementor troubleshooting expert.

My Elementor editor is not loading or is stuck on the loading screen.

Website Details:
- WordPress Version: [Version if known]
- Elementor Version: [Version if known]
- Theme: [Theme Name]
- Affected Page: [Page Name]
- Recent Changes: [Plugin update / Cache plugin / Security plugin / Hosting change]
- Error Message or Console Error: [Paste if available]

Please provide:
1. Possible causes
2. Safe checks inside Elementor tools
3. Plugin conflict testing steps
4. Memory/PHP limit checks
5. Cache/security plugin checks
6. What not to edit
7. Testing checklist after fixing
8. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

10

WooCommerce Checkout Issue Fix Prompt

Place Order button, checkout submit, field issue হলে

WooCommerce / Checkout

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce bug fixing expert.

My WooCommerce checkout page has an issue. Analyze it safely.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: Hello Elementor
- Affected Page: Checkout Page
- Problem: [Place Order not working / fields not showing / checkout reloads / validation
issue]
- Payment Method: [Cash on Delivery / Payment Gateway]
- Recent Changes: [Checkout code / plugin update / cache setup / payment plugin]
- Error Message: [Paste if available]

Requirements:
1. Explain possible causes
2. Tell me what to check first
3. Keep cart, checkout, payment, shipping, and order flow safe
4. Do not edit WooCommerce core files
5. Suggest safest fix method
6. Give full order flow testing checklist
7. Give rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

11

WooCommerce Cart Empty / Cache Issue Prompt

Cart empty, cart update না হওয়া, cache conflict হলে

Cart / Cache / WooCommerce

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce and cache troubleshooting expert.

My WooCommerce cart has a possible cache-related issue.

Website Details:
- Platform: WordPress + WooCommerce
- Theme: [Theme Name]
- Cache Plugin: [Plugin Name]
- Problem: [Cart empty / cart not updating / quantity not changing / wrong cart data]
- Recent Changes: [Cache plugin setup / hosting cache / optimization settings]

Please explain:
1. Possible cache-related causes
2. Which WooCommerce pages should be excluded from cache
3. Which cache/minify settings to check
4. Safe testing workflow
5. How to test product -> cart -> checkout flow
6. What not to edit
7. Rollback plan if cache settings break the site.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

12

Payment Method Missing Prompt

COD/payment gateway checkout-এ না দেখালে

Payment / Checkout

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce payment troubleshooting expert.

My payment method is not showing on the WooCommerce checkout page.

Website Details:
- Payment Method: [Cash on Delivery / Stripe / SSLCommerz / bKash / Other]
- Shipping Zone: [Inside Dhaka / Outside Dhaka / Other]
- Affected Page: Checkout
- Problem: [Payment method not visible / disabled / error]
- Recent Changes: [Payment plugin update / shipping zone update / checkout customization]

Please analyze:
1. Possible causes
2. Payment settings to check
3. Shipping zone dependency checks
4. Currency/location requirements
5. Plugin conflict checks
6. Safe fix method
7. Full checkout/order testing checklist
8. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

13

Shipping / Delivery Charge Wrong Prompt

Shipping charge, zone, free delivery logic ভুল হলে

Shipping / Delivery / Zones

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce shipping settings expert.

My WooCommerce delivery/shipping charge is not working correctly.

Store Details:
- Country: Bangladesh
- Shipping Rules: [Inside Dhaka 60 / Outside Dhaka 120 / Free delivery over 5000]
- Problem: [Wrong charge / no charge / free delivery not working]
- Affected Page: Cart and Checkout
- Recent Changes: [Shipping zone update / custom code / plugin setup]

Please explain:
1. Possible causes
2. Which WooCommerce shipping settings to check
3. Shipping zone and method setup steps
4. Custom code/plugin conflict checks
5. Safe fix method
6. Cart and checkout testing checklist
7. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

14

Product Variation Add to Cart Issue Prompt

Size/color select করার পর add to cart কাজ না করলে

Variable Product / Add to Cart

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce variable product debugging expert.

My variable product add-to-cart is not working properly.

Product Details:
- Product Type: Variable Product
- Attributes: [Size / Color / Fabric]
- Problem: [Variation not selecting / Add to Cart disabled / wrong variation price / not
adding to cart]
- Theme: [Theme Name]
- Recent Changes: [Product setup / variation plugin / quick view / custom add-to-cart
code]

Please analyze:
1. Possible causes
2. Product attribute/variation settings to check
3. Stock and price checks
4. Theme/plugin conflict checks
5. JS console error checks
6. Safe fixing steps
7. Product -> cart -> checkout testing checklist.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

15

Single Product Page Broken Prompt

Product page design, price, button, gallery issue হলে

Single Product / WooCommerce Template

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce product page debugging expert.

My single product page is broken or not displaying correctly.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: [Theme Name]
- Product Page Built With: [Default WooCommerce / Elementor Template]
- Problem: [Gallery broken / price missing / button missing / layout broken]
- Recent Changes: [Elementor template edit / plugin update / custom CSS / WooCommerce
update]

Please provide:
1. Possible causes
2. Elementor template checks if applicable
3. WooCommerce template/plugin checks
4. CSS conflict checks
5. Safe fixing method
6. Mobile testing checklist
7. Full product purchase flow test.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

16

Thank You Page / Order Received Issue Prompt

Order complete page broken বা info missing হলে

Order Received / Thank You Page

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce order flow expert.

My WooCommerce Thank You / Order Received page has an issue.

Problem Details:
- Affected Page: Order Received / Thank You page
- Problem: [Page blank / order details missing / layout broken / wrong message]
- Recent Changes: [Thank you page customization / plugin update / checkout code]
- Theme: [Theme Name]

Please analyze:
1. Possible causes
2. What WooCommerce order data should remain visible
3. Safe layout/CSS fix method
4. What not to remove
5. How to test with a new test order
6. How to verify order number, total, payment, billing/shipping details
7. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

17

WooCommerce Email Notification Issue Prompt

Admin/customer email না গেলে

Email / SMTP / Orders

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce email troubleshooting expert.

WooCommerce order email notifications are not sending properly.

Website Details:
- Platform: WordPress + WooCommerce
- Email Type: [New Order / Processing Order / Completed Order / Customer Invoice]
- Problem: [Admin email not received / customer email not received / email goes to spam]
- SMTP Plugin: [Yes/No - Plugin Name]
- Recent Changes: [SMTP setup / WooCommerce email settings / hosting change]

Please explain:
1. Possible causes
2. WooCommerce email settings to check
3. WordPress admin email checks
4. SMTP setup checks
5. Test order workflow
6. Email deliverability tips
7. Safe fixing steps without editing core files.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

18

Custom Order Status Issue Prompt

Order status add/show/update issue হলে

Order Status / Admin Orders

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce order status debugging expert.

My custom WooCommerce order status is not working properly.

Details:
- Custom Status Name: [Order Confirmed / Packaging / Courier Handed Over]
- Problem: [Status not showing / not selectable / order count missing / email issue]
- Implementation Method: [Custom plugin / child theme / WPCode]
- Recent Changes: [Explain]

Please analyze:
1. Possible causes
2. Whether status registration is correct
3. Admin order list/dropdown checks
4. WooCommerce hook/filter checks
5. Safe fixing method
6. What not to edit
7. Testing checklist with a test order.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

19

My Account / Login Issue Prompt

Login, registration, account dashboard issue হলে

My Account / Login / WooCommerce

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce account page troubleshooting expert.

My WooCommerce My Account or login/register system has an issue.

Website Details:
- Affected Page: My Account / Login / Register
- Problem: [Login not working / registration disabled / dashboard blank / redirect issue]
- Recent Changes: [Security plugin / cache setup / custom code / WooCommerce settings]
- Theme: [Theme Name]

Please explain:
1. Possible causes
2. WooCommerce Accounts & Privacy settings to check
3. Page shortcode/template checks
4. Cache/security plugin checks
5. Safe fix method
6. Testing checklist for login, logout, register, lost password
7. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

20

404 / Permalink Issue Fix Prompt

Page not found, product/category URL broken হলে

404 / Permalink / Rewrite

COPY-READY CODEX PROMPT

```
Act as a senior WordPress permalink and 404 error expert.

My WordPress website has a 404 / Page Not Found issue.

Problem Details:
- Affected URL: [Paste URL]
- Page Type: [Page / Product / Category / Blog / Custom Post Type]
- Problem: [404 showing / product category not opening / permalink broken]
- Recent Changes: [Migration / permalink change / plugin update / custom post type]

Please provide:
1. Possible causes
2. What to check first
3. Permalink refresh steps
4. Page/product status checks
5. Slug conflict checks
6. Safe fix method
7. Testing checklist after fix

Do not edit WordPress core files.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

21 Speed / Cache Issue After Optimization Prompt

Cache plugin setup করার পর design/functionality broken হলে

Speed / Cache / Minify

COPY-READY CODEX PROMPT

```
Act as a senior WordPress speed optimization troubleshooting expert.

After enabling speed/cache optimization, my website has issues.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Cache/Speed Plugin: [Plugin Name]
- Problem: [Layout broken / JS not working / cart issue / old design showing]
- Recent Settings Enabled: [Cache / CSS minify / JS minify / combine / lazy load]

Please analyze:
1. Which optimization settings may cause this issue
2. What to disable first
3. WooCommerce pages to exclude from cache
4. Elementor compatibility checks
5. Safe testing workflow
6. How to clear plugin, hosting, CDN, and browser cache
7. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

22

SSL / Mixed Content Issue Prompt

HTTPS lock missing বা insecure content issue হলে

SSL / Mixed Content / HTTPS

COPY-READY CODEX PROMPT

```
Act as a senior WordPress SSL and mixed content fixing expert.

My website has an SSL or mixed content issue.

Website Details:
- Domain: [Domain]
- Problem: [SSL lock missing / mixed content warning / some images load with http]
- Recent Changes: [Migration / SSL enable / URL change]
- Platform: WordPress + WooCommerce + Elementor

Please explain:
1. Possible causes
2. What URLs to check
3. How to identify mixed content
4. Safe search/replace approach if needed
5. Elementor/media URL checks
6. WooCommerce checkout SSL safety checks
7. Testing checklist after fix
8. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

23

Contact Form Not Sending Prompt

Contact form, request form, inquiry form email issue হলে

Forms / Email / SMTP

COPY-READY CODEX PROMPT

```
Act as a senior WordPress form troubleshooting expert.

My WordPress contact/request form is not sending messages.

Website Details:
- Form Plugin or Custom Form: [Plugin Name / Custom Plugin]
- Affected Page: [Page URL]
- Problem: [Form not submitting / email not received / validation issue]
- SMTP Setup: [Yes/No]
- Error Message: [Paste if available]

Please analyze:
1. Possible causes
2. Form field validation checks
3. Admin email settings checks
4. SMTP setup recommendation
5. Spam/junk issue checks
6. Safe fixing method
7. Test form submission checklist
8. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

24

WPCode / Code Snippet Error Prompt

WPCode snippet add করার পর issue হলে

WPCode / Snippets

COPY-READY CODEX PROMPT

```
Act as a senior WordPress custom code debugging expert.

My website broke after adding a code snippet in WPCode / Code Snippets.

Details:
- Snippet Purpose: [Explain]
- Problem: [Critical error / layout issue / checkout issue / shortcode not working]
- Affected Page: [Page URL]
- Error Message: [Paste if available]
- Code Snippet: [Paste code if safe]

Please explain:
1. Possible cause
2. Which part of the snippet may be problematic
3. Safe way to disable the snippet
4. Provide only the fixed code section if needed
5. Do not change unrelated code
6. Testing checklist
7. Rollback method.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

25

Custom Plugin Error Debug Prompt

নিজের বানানো plugin activate/error/debug করার জন্য

Custom Plugin / Debug

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer and bug fixing expert.

My custom WordPress plugin has an error.

Plugin Details:
- Plugin Name: [Plugin Name]
- Folder: [Plugin Folder]
- Main File: [Main File]
- Feature: [Explain feature]

Problem:
- What I expected: [Expected result]
- What happened: [Actual result]
- Error Message: [Paste full error]
- File Path: [Paste file]
- Line Number: [Paste line]

Requirements:
1. Explain the cause
2. Fix only the plugin code
3. Do not edit WordPress core, WooCommerce core, or theme files
4. Do not rewrite unrelated code
5. Give testing steps
6. Explain how to disable plugin by renaming folder if needed.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

26

Child Theme functions.php Error Prompt

Child theme custom code error হলে

Child Theme / functions.php

COPY-READY CODEX PROMPT

```
Act as a senior WordPress child theme debugging expert.

My child theme custom code caused an error.

Theme Details:
- Parent Theme: [Parent Theme]
- Child Theme: [Child Theme]
- File: functions.php
- Feature I added: [Explain]
- Error Message: [Paste full error]
- Line Number: [Paste line]

Please provide:
1. Cause of the error
2. Whether the hook/function is correct
3. Only the fixed code section
4. Do not edit parent theme or core files
5. How to restore previous functions.php if needed
6. Testing checklist after fixing
7. Rollback method.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

27

Migration / URL Replace Issue Prompt

Localhost to live বা domain change করার পর issue হলে

Migration / URL Replace

COPY-READY CODEX PROMPT

```
Act as a senior WordPress migration troubleshooting expert.

My website has issues after migration or domain change.

Migration Details:
- From URL: [Old URL / localhost]
- To URL: [Live Domain]
- Platform: WordPress + WooCommerce + Elementor
- Problem: [Images missing / links still old / layout broken / 404 / login issue]
- Migration Method: [Plugin / Manual / Hosting tool]

Please analyze:
1. Possible causes
2. URL replacement checks
3. Permalink refresh steps
4. Elementor CSS regenerate step
5. SSL/mixed content checks
6. WooCommerce product/cart/checkout testing checklist
7. Safe fix method
8. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

28

Images Missing After Migration Prompt

Migration/live করার পর image not showing হলে

Images / Media / Migration

COPY-READY CODEX PROMPT

```
Act as a senior WordPress media and migration troubleshooting expert.

Images are missing after moving my website.

Website Details:
- Platform: WordPress + Elementor + WooCommerce
- Old URL: [Old URL]
- New URL: [New URL]
- Problem: [Images not loading / broken image icon / Elementor background missing]
- Affected Pages: [Homepage / Product page / Shop]

Please explain:
1. Possible causes
2. Media library checks
3. Uploads folder path checks
4. URL search/replace checks
5. Elementor background image checks
6. Permission checks
7. Safe fix method
8. Testing checklist and rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

29

Security / Malware Suspicious Issue Prompt

Unknown file, redirect, spam link, suspicious login হলে

Security / Malware / Cleanup Plan

COPY-READY CODEX PROMPT

```
Act as a senior WordPress security cleanup expert.

I suspect my WordPress website has a security or malware issue.

Website Details:
- Platform: WordPress + WooCommerce
- Symptoms: [Redirect / spam link / unknown admin user / suspicious files / warning]
- Recent Changes: [Unknown plugin/theme / nulled plugin / login attempts]
- Hosting: [Hosting Provider]

Please provide:
1. Possible causes
2. Immediate safety steps
3. What to backup before cleanup
4. Plugins/themes/users to check
5. File integrity checks
6. Security plugin scan steps
7. What not to delete blindly
8. Post-cleanup hardening checklist
9. Rollback/recovery plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

30

Debug Log Analysis Prompt

debug.log file থেকে problem identify করার জন্য

Debug Log / Error Analysis

COPY-READY CODEX PROMPT

```
Act as a senior WordPress debug log analyst.

Analyze this WordPress debug log and explain the issue clearly.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Problem: [Explain visible issue]
- Recent Changes: [Plugin/theme/code changes]

Debug Log:
[Paste relevant log lines here]

Please provide:
1. Main error summary
2. Plugin/theme/file involved
3. Error type
4. Possible cause
5. Safe fixing steps
6. What not to edit
7. Testing checklist
8. Rollback plan

Keep the explanation beginner-friendly.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

31

JavaScript Console Error Fix Prompt

Button, popup, add to cart, Elementor interaction issue হলে

JS / Console / Frontend

COPY-READY CODEX PROMPT

```
Act as a senior WordPress frontend JavaScript debugging expert.

My website has a JavaScript-related issue.

Website Details:
- Platform: WordPress + Elementor + WooCommerce
- Affected Page: [Page URL]
- Problem: [Button not clicking / popup not opening / add to cart issue / slider broken]
- Browser Console Error: [Paste console error]
- Recent Changes: [Plugin update / cache minify / custom JS]

Please analyze:
1. What the console error means
2. Possible plugin/cache/custom JS causes
3. What to check first
4. Safe fix method
5. Whether JS minify/combine may be involved
6. Testing checklist on desktop and mobile
7. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

32

Mobile Responsive Bug Fix Prompt

Mobile spacing, overflow, button, product card issue হলে

Mobile / Responsive / CSS

COPY-READY CODEX PROMPT

```
Act as a senior WordPress responsive design fixing expert.

My website has a mobile responsive issue.

Details:
- Platform: WordPress + Elementor + WooCommerce
- Affected Page: [Page URL]
- Device Width: [Mobile / Tablet]
- Problem: [Horizontal scroll / text overlap / button too small / product card broken]
- Expected Layout: [Explain]
- Recent Changes: [Custom CSS / Elementor edit / plugin]

Requirements:
1. Explain possible causes
2. Provide safe scoped CSS if needed
3. Do not affect desktop layout
4. Do not use global CSS that breaks other pages
5. Test on mobile/tablet/desktop
6. Give rollback method.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

33

Header/Footer Broken Fix Prompt

Header/menu/footer layout broken হলে

Header / Footer / Elementor

COPY-READY CODEX PROMPT

```
Act as a senior WordPress header/footer troubleshooting expert.

My website header or footer is broken.

Website Details:
- Builder: [Elementor / Theme Builder / Default Theme]
- Theme: [Theme Name]
- Affected Area: Header / Footer
- Problem: [Menu broken / logo missing / sticky header overlap / footer missing]
- Recent Changes: [Elementor template edit / cache setup / theme update / custom CSS]

Please provide:
1. Possible causes
2. Template assignment checks
3. Menu/location checks
4. Cache and CSS checks
5. Safe fixing method
6. Mobile menu testing checklist
7. Rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

34

Shortcode Not Working Prompt

Custom shortcode output না আসলে

Shortcode / Plugin / Elementor

COPY-READY CODEX PROMPT

```
Act as a senior WordPress shortcode debugging expert.

My custom shortcode is not working properly.

Details:
- Shortcode: [shortcode_name]
- Used On: [Page / Elementor Shortcode Widget / Product Template]
- Plugin/Theme File: [Where shortcode is registered]
- Problem: [Output missing / broken design / PHP error / only text showing]
- Recent Changes: [Plugin update / code edit]

Please analyze:
1. Possible shortcode registration issue
2. Whether add_shortcode() is correct
3. Callback function checks
4. Output escaping checks
5. Elementor shortcode widget checks
6. Safe fix method
7. Testing checklist and rollback plan.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

35

Bug Fix Final QA Checklist Prompt

Fix করার পর final testing checklist নেওয়ার জন্য

QA / Testing / Delivery

COPY-READY CODEX PROMPT

```
Act as a senior WordPress QA tester.

Create a final testing checklist after fixing a WordPress/WooCommerce bug.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Bug Fixed: [Explain what was fixed]
- Affected Area: [Page/Feature]
- Store Type: Ecommerce

Please create a checklist for:
1. Homepage test
2. Product page test
3. Shop/category page test
4. Cart test
5. Checkout test
6. Payment/shipping test
7. Order received page test
8. Email notification test
9. Mobile responsive test
10. Browser console error check
11. Cache clear test
12. Rollback readiness

Keep it practical and client-delivery focused.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

36

Codex Direct Bug Fix Prompt with Approval

Codex দিয়ে analyze-first safe fix করানোর জন্য

Codex / Direct Fix / Approval

COPY-READY CODEX PROMPT

```
Act as a senior WordPress, WooCommerce, and Elementor bug fixing expert.

Analyze my project and fix this issue safely. Do not change anything before explaining
the plan.

Issue:
[Describe the issue clearly]

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: [Theme Name]
- Affected Page/Feature: [Page or Feature]
- Recent Changes: [Explain]
- Error Message: [Paste if available]

First provide:
1. Possible cause
2. Files/settings you need to check
3. Best safe fixing method
4. Risk level
5. Rollback plan

After I approve, directly implement the fix.

Rules:
- Do not edit WordPress core, WooCommerce core, Elementor core, or parent theme files
- Do not change unrelated code
- Keep WooCommerce cart, checkout, payment, shipping, and order flow safe
- After fixing, summarize files/settings changed and testing steps.
```

আপনার project অনুযায়ী bracket-এর information replace করুন, তারপর prompt টি Codex/ChatGPT-তে paste করুন। Fix apply করার আগে backup এবং testing checklist অবশ্যই follow করুন।

Final Student Checklist

Bug fixing prompt use করার পর এই checklist follow করুন:

- AI/Codex output-এ possible cause আছে কি না check করুন
- Core file edit করতে বলছে কি না verify করুন
- Fix করার আগে backup নিন
- Only affected file/settings change করুন
- Homepage, affected page এবং mobile view test করুন
- WooCommerce হলে product, cart, checkout, order flow test করুন
- Cache clear করে আবার test করুন
- Console error এবং PHP error log check করুন
- Rollback file/code ready রাখুন

Main Message

Bug fixing মানে random code change করা না। আগে problem বুঝুন, backup নিন, AI/Codex-কে clear prompt দিন, তারপর safe method-এ fix করে full testing করুন।
