Module 21 - Bonus AI Prompt Library

Lesson 7:
Codex Prompt
for Plugin Development

WordPress এবং WooCommerce website-এ coding দিয়ে custom feature add করার জন্য premium, ecommerce-focused, copy-ready Codex prompt library.

Class Topic
Codex Prompt for Plugin Development

Main Focus
WooCommerce, shortcode, admin settings, cart, checkout, order, automation

Total Prompts
36 copy-ready plugin prompts

Best For
ChatGPT, Codex, Cursor, AI Studio planning

এই PDF কীভাবে ব্যবহার করবেন

এই PDF-এ WordPress এবং WooCommerce website-এর জন্য বিভিন্ন ধরনের plugin development prompt দেওয়া হয়েছে। আপনি prompt copy করে Codex বা ChatGPT-তে ব্যবহার করতে পারবেন। যেখানে bracket আছে, যেমন [PLUGIN NAME] বা [EXPLAIN FEATURE], সেখানে নিজের project অনুযায়ী information replace করুন।

PDF Goal

এই prompt library ব্যবহার করে আপনি AI/Codex দিয়ে safe, clean এবং ecommerce-focused plugin feature plan ও implement করতে পারবেন।

Safety Rule

WordPress core, WooCommerce core, Elementor core বা parent theme file edit করা যাবে না।

Prompt দেওয়ার আগে এই information ready রাখুন:

- Plugin name, folder name, main file name
- Feature exactly কী করবে
- Shortcode লাগবে কি না
- Admin settings বা Customizer settings দরকার কি না
- WooCommerce product/cart/checkout/order flow affected হবে কি না
- Security: nonce, sanitize, escape
- Testing checklist এবং rollback plan

Use Case	Best Plugin Type	Example
Page-এর যেকোনো জায়গায় output	Shortcode Plugin	Size guide, FAQ, comparison table
Dashboard থেকে option control	Admin Settings Plugin	Notice banner, contact settings
WooCommerce product/order feature	WooCommerce Hook Plugin	Buy Now, order status, checkout notice
Frontend automatic display	wp_footer / hook-based plugin	Floating WhatsApp, sticky contact button

Prompt Library Index

নিচের list অনুযায়ী PDF-এর promptগুলো সাজানো হয়েছে। Ecommerce website-এর practical feature prompt প্রথমে রাখা হয়েছে, তারপর admin, support, SEO, security, maintenance এবং debugging prompt দেওয়া হয়েছে।

01 Master Codex Plugin Development Prompt

02 Floating WhatsApp + Product WhatsApp Button Plugin

03 Product Size Guide / Size Chart Plugin

04 Dynamic Sale Badge Shortcode Plugin

05 New Arrival / Best Seller / Hot Sale Badge Plugin

06 Stock & Offer Message Plugin

07 Buy Now Direct Checkout Button Plugin

08 Custom Delivery Charge Logic Plugin

09 Free Shipping Progress Bar Plugin

10 Cart Upsell / Add More Offer Plugin

11 Checkout Field Manager Plugin

12 Checkout Trust Message / COD Notice Plugin

13 Thank You Page Enhancer Plugin

14 Custom Order Status Plugin

15 Frontend Track Order Shortcode Plugin

16 Order Alert Email / Telegram Concept Plugin

17 Product FAQ Accordion Plugin

18 Product Review Display / Review Request Plugin

19 Product Comparison Table Plugin

27 Admin Sales Summary Dashboard Widget Plugin

28 Low Stock Alert Plugin

29 Basic Invoice / Packing Slip Plugin

30 Quick Order Form Plugin

31 FAQ Schema Helper Plugin

32 Login Attempt Limit Plugin

33 Maintenance Mode / Coming Soon Plugin

34 Backup Reminder Admin Notice Plugin

35 Custom Code Snippet Manager Plugin

36 Plugin Debug & Fix Prompt Template

Professional Codex Plugin Prompt Formula

ভালো Codex prompt লিখতে হলে শুধু feature বললেই হবে না। Codex-কে exact file path, plugin structure, security rule, testing এবং rollback instruction দিতে হবে।

Formula:

Role + Plugin Details + Feature Requirements + Technical Requirements + Security Rules + Design Requirements + Safety Rules + Testing Steps + Rollback Plan

Usage Explanation

এই PDF ব্যবহার করার সময় prompt-এর মধ্যে “Directly implement” বা “Create plugin files” clearভাবে রাখুন। এতে Codex শুধু code দেখানোর বদলে proper file structure, implementation step, testing checklist এবং rollback method সহ কাজ করতে পারবে।

Common Mistakes

- Plugin folder/main file না বলা
- Security rule না দেওয়া
- WooCommerce core edit করতে নিষেধ না করা
- Testing checklist না চাওয়া
- Rollback plan না চাওয়া
- Shortcode বা admin settings requirement unclear রাখা

01

Core Template

এই section-এর promptগুলো Core Template category-এর practical WordPress/WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

01

CORE TEMPLATE

Master Codex Plugin Development Prompt

Use: যেকোনো WordPress plugin project শুরু করার master prompt.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Directly create a production-ready WordPress plugin for my project. Do not only explain code.

Plugin Details:
- Plugin Name: [PLUGIN NAME]
- Folder Name: [plugin-folder-name]
- Main File: [plugin-main-file.php]
- Author: [AUTHOR NAME]
- Website Type: WordPress + WooCommerce + Elementor
- Main Feature: [EXPLAIN FEATURE CLEARLY]

Requirements:
- Add proper WordPress plugin header
- Keep the plugin clean, lightweight, and beginner-friendly
- Use WordPress hooks/functions properly
- Use WooCommerce functions only when needed
- Use nonce security for forms/settings
- Sanitize all input and escape all output
- Use scoped responsive CSS only for this plugin
- No Bootstrap, no jQuery, no external libraries
- Do not edit WordPress core, WooCommerce core, Elementor core, or theme files

Before implementation, analyze the project and tell me the safest method, files to create, risk level, and rollback plan. After approval, implement and summarize files changed, usage, testing steps, and rollback method.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

02

Ecommerce Contact

এই section-এর promptগুলো Ecommerce Contact category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

02

ECOMMERCE CONTACT

Floating WhatsApp + Product WhatsApp Button Plugin

Use: সব পেজে floating WhatsApp icon এবং single product page shortcode button.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress and WooCommerce plugin developer.

Create a plugin named "StyleHaat WhatsApp Connect".
Folder: stylehaat-whatsapp-connect
Main File: stylehaat-whatsapp-connect.php

Features:
1. Show a floating WhatsApp icon automatically on every frontend page using wp_footer.
2. Position: bottom right corner.
3. Create shortcode: [stylehaat_product_whatsapp]
4. The shortcode will show an "Order on WhatsApp" button on WooCommerce single product page.
5. Product button message must include dynamic product title and product URL.
6. Add settings in Appearance > Customize > StyleHaat WhatsApp.

Customizer Fields:
- WhatsApp Number
- Floating Message
- Product Button Text
- Enable/Disable Floating Icon

Use get_theme_mod(), sanitize_text_field(), esc_html(), esc_attr(), esc_url(), add_shortcode(), and WooCommerce
product functions safely. Keep CSS scoped and responsive. Do not edit core/theme files. Explain install, settings,
shortcode usage, and testing.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

03

Ecommerce Product

এই section-এর promptগুলো Ecommerce Product category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

03

ECOMMERCE PRODUCT

Product Size Guide / Size Chart Plugin

Use: Fashion product page-এ shortcode দিয়ে size chart দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Size Guide".
Folder: stylehaat-size-guide
Main File: stylehaat-size-guide.php

Create shortcode: [stylehaat_size_guide]

When used on a product page or Elementor shortcode widget, show a clean responsive size guide table.

Default Table:
- Size, Chest, Length
- S - 38 inch - 26 inch
- M - 40 inch - 27 inch
- L - 42 inch - 28 inch
- XL - 44 inch - 29 inch
- XXL - 46 inch - 30 inch

Design: orange/black style, white card, rounded corners, mobile-friendly, no horizontal scroll.

Technical: add_shortcode(), proper plugin header, esc_html(), scoped CSS, no external libraries, no core/theme
edits. Explain folder/file creation, activation, shortcode usage, and Elementor test.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

04

ECOMMERCE PRODUCT

Dynamic Sale Badge Shortcode Plugin

Use: Elementor product loop বা product card-এ dynamic discount badge দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Sale Badge".
Folder: stylehaat-sale-badge
Main File: stylehaat-sale-badge.php

Create shortcode: [stylehaat_sale_badge]

Requirements:
- Use current WooCommerce loop product automatically
- Show badge only if product is on sale
- Show dynamic discount like "21% OFF"
- If percentage cannot be calculated, show "SALE"
- Support simple products
- Support variable products if possible
- If product is not on sale, return nothing and create no empty space

Design:
- Small badge text, white text, orange/black style
- Scoped CSS only
- Mobile friendly

Do not edit WooCommerce core, WordPress core, or theme files. Use WooCommerce product functions safely and escape
output properly. Explain shortcode usage and testing on sale/non-sale products.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

05

ECOMMERCE PRODUCT

New Arrival / Best Seller / Hot Sale Badge Plugin

Use: Product card বা single product page-এ smart product badges দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Product Badges".
Folder: stylehaat-product-badges
Main File: stylehaat-product-badges.php

Create shortcode: [stylehaat_product_badges]

Badge Logic:
- If product is on sale, show "Hot Sale"
- If product is featured, show "Best Seller"
- If product was published within the last 14 days, show "New Arrival"
- If none match, show nothing

Requirements:
- Work inside WooCommerce loop and single product page
- Use current product automatically
- Keep badges clean and responsive
- Use orange/black design with scoped CSS
- No Bootstrap, no jQuery, no external libraries
- Sanitize and escape output properly

Do not edit core/theme files. Explain shortcode usage in Elementor product loop and WooCommerce product page.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

06

ECOMMERCE PRODUCT

Stock & Offer Message Plugin

Use: Single product page-এ stock status এবং offer message দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Stock Offer Message".
Folder: stylehaat-stock-offer-message
Main File: stylehaat-stock-offer-message.php

Create shortcode: [stylehaat_stock_offer_message]

Display dynamic messages:
- In stock: "In Stock - Ready to Ship"
- Low stock: "Only X left in stock"
- Out of stock: "Out of Stock"
- On sale: "Limited Offer - Save X%"

Requirements:
- Use current WooCommerce product automatically
- Work on single product page and Elementor product template
- Show clean card/message UI
- Orange/black style, scoped CSS, responsive
- Return nothing if no valid product is found
- Escape all output

Do not edit WooCommerce core or theme files. Explain installation, shortcode use, and test cases for in-stock, low-stock, out-of-stock, and sale products.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

04

Ecommerce Conversion

এই section-এর promptগুলো Ecommerce Conversion category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

07

ECOMMERCE CONVERSION

Buy Now Direct Checkout Button Plugin

Use: Single product page থেকে সরাসরি checkout পাঠানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce developer.

Create a plugin named "StyleHaat Buy Now".
Folder: stylehaat-buy-now
Main File: stylehaat-buy-now.php

Create shortcode: [stylehaat_buy_now]

Feature:
- Show a "Buy Now" button on WooCommerce single product page
- When clicked, add product to cart and redirect directly to checkout
- Support simple products
- Support variable products only after variation is selected
- Do not break the default Add to Cart button

Design:
- Full-width optional button style
- Black background, white text, rounded corners
- Scoped responsive CSS

Technical:
- Use WooCommerce hooks/functions safely
- Validate product and variation data
- Do not edit WooCommerce core/theme files
- Keep cart, checkout, payment, and order flow safe

Explain shortcode placement, testing for simple/variable products, and rollback method.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

05

Ecommerce Checkout

এই section-এর promptগুলো Ecommerce Checkout category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

08

ECOMMERCE CHECKOUT

Custom Delivery Charge Logic Plugin

Use: Bangladesh ecommerce store-এ delivery charge logic add করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce shipping developer.

Create a plugin named "StyleHaat Delivery Charge".
Folder: stylehaat-delivery-charge
Main File: stylehaat-delivery-charge.php

Goal:
Add safe custom delivery charge logic for a Bangladesh WooCommerce store.

Rules:
- Inside Dhaka delivery: 60 BDT
- Outside Dhaka delivery: 120 BDT
- Free delivery if cart subtotal is 5000 BDT or more
- Do not duplicate shipping fees
- Show clear label on cart and checkout

Requirements:
- Use WooCommerce fees/shipping hooks safely
- Do not break payment, cart, checkout, or order flow
- Do not edit WooCommerce core files
- Keep code clean and beginner-friendly
- Sanitize/escape output

Also explain whether using WooCommerce Shipping Zones is better. If custom code is used, implement safely and give
testing steps for inside Dhaka, outside Dhaka, and free delivery.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

06

Ecommerce Cart

এই section-এর promptগুলো Ecommerce Cart category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

09

ECOMMERCE CART

Free Shipping Progress Bar Plugin

Use: Cart/checkout-এ customer-কে বেশি order করতে encourage করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Free Shipping Bar".
Folder: stylehaat-free-shipping-bar
Main File: stylehaat-free-shipping-bar.php

Feature:
Show a progress bar on cart and checkout pages.

Logic:
- Free shipping threshold: 5000 BDT
- If subtotal is below threshold, show: "Add X BDT more to get free delivery"
- If subtotal is equal or above threshold, show: "Congratulations! You unlocked free delivery"
- Progress bar should update based on cart subtotal

Design:
- Clean orange/black style
- Responsive card layout
- Scoped CSS

Technical:
- Use WooCommerce cart functions safely
- Do not change shipping/payment logic
- Do not edit core/theme files
- No external libraries

Explain how to test with different cart totals and how to disable/remove the plugin.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

10

ECOMMERCE CART

Cart Upsell / Add More Offer Plugin

Use: Cart page-এ related/featured product suggestion show করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce conversion plugin developer.

Create a plugin named "StyleHaat Cart Upsell".
Folder: stylehaat-cart-upsell
Main File: stylehaat-cart-upsell.php

Feature:
Show a small upsell section on WooCommerce cart page.

Requirements:
- Display 3 featured or best-selling products under cart totals
- Include product image, title, price, and Add to Cart button
- Do not show products already in cart
- Keep layout responsive and clean
- Orange/black design style
- Use WooCommerce product query safely
- Use scoped CSS

Technical:
- Do not edit WooCommerce templates directly
- Use hooks where possible
- Do not affect checkout/payment/order flow
- Escape output properly

Explain files created, hook used, how to set featured products, and how to test on cart page.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

07

Ecommerce Checkout

এই section-এর promptগুলো Ecommerce Checkout category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

11

ECOMMERCE CHECKOUT

Checkout Field Manager Plugin

Use: Checkout form থেকে unnecessary fields remove/add করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce checkout developer.

Create a plugin named "StyleHaat Checkout Fields".
Folder: stylehaat-checkout-fields
Main File: stylehaat-checkout-fields.php

Feature:
Simplify WooCommerce checkout form for Bangladesh ecommerce store.

Requirements:
- Remove optional company name field
- Make phone field required
- Add placeholder text for address and phone
- Optionally add a custom field: Delivery Area
- Keep billing/shipping/order data safe
- Do not remove important WooCommerce required fields
- Do not break payment or order submission

Technical:
- Use woocommerce_checkout_fields filter safely
- Sanitize custom field input
- Save custom field to order meta if added
- Escape output in admin/order display
- No core/theme edits

Explain changed fields, how to test checkout, and rollback method.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

12

ECOMMERCE CHECKOUT

Checkout Trust Message / COD Notice Plugin

Use: Checkout page-এ trust message, COD notice, delivery note দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Checkout Trust Notice".
Folder: stylehaat-checkout-trust-notice
Main File: stylehaat-checkout-trust-notice.php

Feature:
Add a trust notice box on WooCommerce checkout page.

Content:
- Cash on Delivery Available
- Order confirmation call may be made before delivery
- Easy exchange support available
- Secure checkout message

Requirements:
- Show notice above the payment section or order review section
- Orange/black clean design
- Scoped responsive CSS
- No jQuery or external libraries
- Do not modify payment/order logic
- Do not edit WooCommerce templates/core files

Use proper WooCommerce checkout hooks. Escape all output. Explain hook used, where the notice appears, and how to
test checkout page on mobile.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

08

Ecommerce Order

এই section-এর promptগুলো Ecommerce Order category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

13

ECOMMERCE ORDER

Thank You Page Enhancer Plugin

Use: Order received page-কে premium layout এবং next step message দিতে.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Thank You Enhancer".
Folder: stylehaat-thank-you-enhancer
Main File: stylehaat-thank-you-enhancer.php

Goal:
Improve WooCommerce Thank You / Order Received page without removing default order information.

Requirements:
- Keep default order number, date, email, total, payment method, order details, billing/shipping address
- Add a clean success message card
- Add next steps: order confirmation, processing, delivery estimate
- Add WhatsApp support button if a number is set in code/plugin option
- Design: white cards, orange/black accents, responsive
- CSS scoped to body.woocommerce-order-received only

Do not hardcode order data. Use WooCommerce dynamic order data only. Do not edit WooCommerce templates/core files.
Explain testing steps with a test order.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

14

ECOMMERCE ORDER

Custom Order Status Plugin

Use: COD store workflow: Confirmed, Packaging, Courier status add করতে.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce order workflow developer.

Create a plugin named "StyleHaat Custom Order Status".
Folder: stylehaat-custom-order-status
Main File: stylehaat-custom-order-status.php

Add custom order statuses:
- Order Confirmed
- Packaging
- Courier Handed Over

Requirements:
- Register statuses properly
- Show statuses in WooCommerce order list and dropdown
- Do not remove default WooCommerce statuses
- Do not automatically change payment/order logic
- Do not send emails unless requested
- Keep code clean and safe
- Escape all output

Also add short admin notes explaining what each status means.

Do not edit WooCommerce core files. Explain how to test with a test order and how to rollback by deactivating the plugin.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

15

ECOMMERCE ORDER

Frontend Track Order Shortcode Plugin

Use: Customer order ID দিয়ে frontend থেকে order status check করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Track Order".
Folder: stylehaat-track-order
Main File: stylehaat-track-order.php

Create shortcode: [stylehaat_track_order]

Feature:
- Show order ID input and Track Now button
- After valid input, show order status, order date, payment method, total, and item summary
- Hide sensitive customer address unless user is logged in and owns the order
- Show privacy message for hidden data
- Show clean error for empty/invalid order ID

Design:
- Modern orange/black card layout
- Responsive, mobile-friendly
- Scoped CSS

Security:
- Use nonce
- Sanitize input
- Escape output
- Do not expose private data publicly

Use wc_get_order() safely. Do not edit core/theme files. Explain testing with valid/invalid order IDs.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

16

ECOMMERCE ORDER

Order Alert Email / Telegram Concept Plugin

Use: নতুন order হলে admin/team alert পাওয়ার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce automation developer.

Create a plugin named "StyleHaat Order Alert".
Folder: stylehaat-order-alert
Main File: stylehaat-order-alert.php

Feature:
Send an internal alert when a new WooCommerce order is created.

Requirements:
- Use WooCommerce order hook safely
- Send alert to admin email by default
- Optional settings page for alert email address
- Include order number, customer name, phone, total, payment method, and admin order link
- Do not expose data publicly
- Do not change order status or payment logic
- Use nonce, sanitize_email(), sanitize_text_field(), esc_html()
- No external API unless I provide credentials

If Telegram integration is added, keep it optional with token/chat ID settings and safe validation.

Explain setup, testing with a test order, privacy rules, and rollback method.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

09

Ecommerce Product

এই section-এর promptগুলো Ecommerce Product category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

17

ECOMMERCE PRODUCT

Product FAQ Accordion Plugin

Use: Product page-এ reusable FAQ accordion show করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress/WooCommerce plugin developer.

Create a plugin named "StyleHaat Product FAQ".
Folder: stylehaat-product-faq
Main File: stylehaat-product-faq.php

Create shortcode: [stylehaat_product_faq]

Feature:
Show a clean FAQ accordion for product pages.

Default FAQ topics:
- Cash on delivery
- Delivery time
- Size exchange
- Product quality
- Return/exchange policy

Requirements:
- Shortcode should work in Elementor and product pages
- Allow shortcode attributes for custom title if possible
- Accordion should work without jQuery
- Use accessible HTML if possible
- Orange/black design, scoped CSS
- Responsive and mobile-friendly

No external libraries. Do not edit theme/core files. Escape all output. Explain shortcode usage and test steps.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

10

Ecommerce Trust

এই section-এর promptগুলো Ecommerce Trust category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

18

ECOMMERCE TRUST

Product Review Display / Review Request Plugin

Use: Review section বা order complete-এর পর review request message দেখাতে.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Review Booster".
Folder: stylehaat-review-booster
Main File: stylehaat-review-booster.php

Features:
1. Shortcode [stylehaat_reviews_box] to show a clean review/testimonial section
2. Add a review request message on Thank You page after order completion

Requirements:
- Do not create fake reviews automatically
- Use static admin-configurable review texts only if settings page is created
- Keep design clean, orange/black, responsive
- Thank You page message should not remove default order details
- Use safe hooks and scoped CSS
- Sanitize settings and escape output

Do not edit WooCommerce core/theme files. Explain how to use shortcode, where the review request appears, and how
to test with a test order.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

11

Ecommerce Product

এই section-এর promptগুলো Ecommerce Product category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

19

ECOMMERCE PRODUCT

Product Comparison Table Plugin

Use: Customer যেন combo/variant/plan compare করতে পারে.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Product Comparison Table".
Folder: stylehaat-product-comparison
Main File: stylehaat-product-comparison.php

Create shortcode: [stylehaat_comparison_table]

Feature:
Show a responsive comparison table for ecommerce products or offers.

Default columns:
- Feature
- Basic
- Premium
- Combo Offer

Rows:
- Price
- Fabric/Quality
- Delivery
- Exchange Support
- Best For

Requirements:
- Allow shortcode attributes to customize heading if possible
- Mobile-friendly table/cards
- Orange/black design
- Scoped CSS
- No external libraries
- Escape output properly

Explain install, shortcode use, and how to customize content inside code or attributes.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

12

Ecommerce Marketing

এই section-এর promptগুলো Ecommerce Marketing category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

20

ECOMMERCE MARKETING

Flash Sale Countdown Plugin

Use: Offer/landing page-এ urgency তৈরির জন্য countdown timer.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Flash Sale Countdown".
Folder: stylehaat-flash-sale-countdown
Main File: stylehaat-flash-sale-countdown.php

Create shortcode: [stylehaat_countdown end="2026-12-31 23:59:59"]

Feature:
- Show countdown days/hours/minutes/seconds
- Show offer title: "Limited Time Offer"
- When expired, show "Offer expired"

Requirements:
- Lightweight vanilla JavaScript only
- No jQuery, no external library
- Scoped CSS and JS
- Responsive orange/black style
- Sanitize shortcode attributes and escape output
- Work inside Elementor shortcode widget and landing pages

Do not edit core/theme files. Explain shortcode usage, how to set end time, testing, and rollback.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

21

ECOMMERCE MARKETING

Coupon Banner / Offer Bar Plugin

Use: Top bar বা page section-এ coupon/discount announcement show করতে.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Coupon Banner".
Folder: stylehaat-coupon-banner
Main File: stylehaat-coupon-banner.php

Features:
- Show a frontend top offer bar automatically
- Admin settings page to change offer text and coupon code
- Enable/disable banner option
- Optional shortcode: [stylehaat_coupon_banner]

Default Text:
"Use code STYLE10 and get 10% off today"

Requirements:
- Use WordPress Options API
- Use nonce security
- Sanitize inputs and escape output
- Orange/black responsive design
- Scoped CSS
- No external libraries
- Do not edit theme/core files

Explain settings page, frontend display, shortcode usage, and testing steps.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

13

Ecommerce Support

এই section-এর promptগুলো Ecommerce Support category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

22

ECOMMERCE SUPPORT

Floating Multi Contact Button Plugin

Use: WhatsApp, phone, messenger, email buttons এক জায়গায় রাখতে.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Floating Contact Hub".
Folder: stylehaat-floating-contact-hub
Main File: stylehaat-floating-contact-hub.php

Feature:
Show a floating contact hub at bottom right with buttons for:
- WhatsApp
- Phone Call
- Email
- Messenger or Facebook link

Admin settings:
- WhatsApp number
- Phone number
- Email address
- Facebook/Messenger link
- Enable/disable each button

Requirements:
- Use Options API or Customizer API
- Sanitize all settings
- Escape all output
- Open external links safely
- Use inline SVG/simple icons, no icon library
- Scoped responsive CSS
- Do not edit core/theme files

Explain how to configure and test each contact button.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

14

Lead & Forms

এই section-এর promptগুলো Lead & Forms category-এর practical WordPress/WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

23

LEAD & FORMS

Contact / Request Form Plugin

Use: Contact, product inquiry, callback request form বানাতে.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Contact Form".
Folder: stylehaat-contact-form
Main File: stylehaat-contact-form.php

Create shortcode: [stylehaat_contact_form]

Form fields:
- Name
- Email
- Phone
- Message

Submission:
- Send form data to WordPress admin email using wp_mail()
- Show success/error messages
- Do not save data in database for now

Security:
- Use nonce
- sanitize_text_field() for name/phone
- sanitize_email() for email
- sanitize_textarea_field() for message
- Validate required fields and email
- Escape output

Design: orange/black responsive form, scoped CSS, no external libraries. Explain install, shortcode use, email
test, and troubleshooting if email does not arrive.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

24

LEAD & FORMS

Newsletter / Lead Capture Plugin

Use: Landing page বা homepage-এ lead capture form add করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Lead Capture".
Folder: stylehaat-lead-capture
Main File: stylehaat-lead-capture.php

Create shortcode: [stylehaat_lead_form]

Fields:
- Name
- Email
- Phone optional

Requirements:
- Show a clean lead form with offer text
- Send lead details to admin email
- Optional: store leads in a custom database table only if implemented safely
- Use nonce, sanitization, validation, escaping
- Add admin page to view basic leads if database storage is added
- No external email marketing API unless credentials are provided
- Orange/black design, scoped CSS

Do not edit core/theme files. Explain GDPR/privacy note, testing, and rollback.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

15

Ecommerce Account

এই section-এর promptগুলো Ecommerce Account category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

25

ECOMMERCE ACCOUNT

Custom My Account Dashboard Plugin

Use: WooCommerce My Account page-এ custom cards/links add করতে.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat My Account Enhancer".
Folder: stylehaat-my-account-enhancer
Main File: stylehaat-my-account-enhancer.php

Feature:
Improve WooCommerce My Account dashboard by adding helpful cards/links:
- My Orders
- Track Order
- Return/Exchange Request
- WhatsApp Support
- Size Guide

Requirements:
- Use WooCommerce account hooks/endpoints safely
- Do not remove default WooCommerce account functionality
- Keep design responsive and clean
- Use orange/black style with scoped CSS
- Sanitize and escape output
- Do not expose private user data

Do not edit WooCommerce templates/core files. Explain where the cards appear and how to test logged-in customer
flow.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

16

Ecommerce Support

এই section-এর promptগুলো Ecommerce Support category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

26

ECOMMERCE SUPPORT

Return / Exchange Request Plugin

Use: Customer product return/exchange request submit করতে.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Return Exchange".
Folder: stylehaat-return-exchange
Main File: stylehaat-return-exchange.php

Create shortcode: [stylehaat_return_exchange_form]

Form fields:
- Order ID
- Customer phone/email
- Product name
- Request type: Return or Exchange
- Reason
- Message

Requirements:
- Use nonce security
- Sanitize and validate all fields
- Send request to admin email
- Do not expose order data publicly
- Optional: verify order ID and billing email/phone if possible
- Show success/error messages
- Responsive orange/black design
- Scoped CSS

Do not edit core/theme files. Explain how to place form on a Return & Exchange page and test with sample order
info.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

17

Ecommerce Admin

এই section-এর promptগুলো Ecommerce Admin category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

27

ECOMMERCE ADMIN

Admin Sales Summary Dashboard Widget Plugin

Use: Admin dashboard-এ today sales, orders, pending count দেখাতে.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress/WooCommerce plugin developer.

Create a plugin named "StyleHaat Sales Dashboard".
Folder: stylehaat-sales-dashboard
Main File: stylehaat-sales-dashboard.php

Feature:
Add a WordPress dashboard widget for WooCommerce store summary.

Show:
- Today's orders
- Processing orders
- Completed orders
- Pending payment orders
- Today's sales total
- Low stock product count

Requirements:
- Use WooCommerce order functions safely
- Admin-only display using proper capability check
- Do not expose data to frontend
- Keep queries lightweight
- Escape output
- Clean admin card design
- No external libraries

Do not edit WooCommerce core files. Explain dashboard location, how data is calculated, and how to test.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

28

ECOMMERCE ADMIN

Low Stock Alert Plugin

Use: Stock কম হলে admin alert/notice দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Low Stock Alert".
Folder: stylehaat-low-stock-alert
Main File: stylehaat-low-stock-alert.php

Feature:
Show admin dashboard notice/list for low stock WooCommerce products.

Requirements:
- Default low stock threshold: 5
- Admin settings field to change threshold
- Show product name, current stock, edit product link
- Admin-only access
- Use nonce, sanitize_text_field(), absint(), esc_html(), esc_url()
- Keep queries lightweight
- Do not modify stock automatically

Do not edit WooCommerce core files. Explain settings, how to test with low stock product, and rollback method.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

18

Ecommerce Docs

এই section-এর promptগুলো Ecommerce Docs category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

29

ECOMMERCE DOCS

Basic Invoice / Packing Slip Plugin

Use: Admin order page থেকে simple invoice/packing info print করতে.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Simple Invoice".
Folder: stylehaat-simple-invoice
Main File: stylehaat-simple-invoice.php

Feature:
Add a simple printable invoice/packing slip view for WooCommerce orders.

Requirements:
- Add admin order action or metabox link: "Print Invoice"
- Invoice should show store name, order number, date, customer name, phone, address, product list, quantity, total, payment method
- Admin-only access
- Use WooCommerce order data dynamically
- Do not expose invoice publicly without permission
- Print-friendly CSS
- Escape output properly

Do not edit WooCommerce templates/core files. Explain how to open invoice from admin order page and test with a sample order.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

19

Ecommerce Product

এই section-এর promptগুলো Ecommerce Product category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

30

ECOMMERCE PRODUCT

Quick Order Form Plugin

Use: Product page-এ quick order form দিয়ে COD order request নেওয়ার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a plugin named "StyleHaat Quick Order".
Folder: stylehaat-quick-order
Main File: stylehaat-quick-order.php

Create shortcode: [stylehaat_quick_order]

Feature:
Show quick order form on product page.

Fields:
- Name
- Phone
- Address
- Quantity
- Product ID/title hidden/dynamic

Requirements:
- Use current WooCommerce product automatically
- On submit, either create a pending WooCommerce order safely or send request to admin email
- Use nonce, sanitization, validation, escaping
- Do not bypass payment/order logic in an unsafe way
- Orange/black responsive design
- Scoped CSS

Explain which method you choose, how to test, and how admin receives the order/request.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

20

SEO & Schema

এই section-এর promptগুলো SEO & Schema category-এর practical WordPress/WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

31

SEO & SCHEMA

FAQ Schema Helper Plugin

Use: FAQ page বা landing page-এর FAQ schema add করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress SEO plugin developer.

Create a plugin named "StyleHaat FAQ Schema".
Folder: stylehaat-faq-schema
Main File: stylehaat-faq-schema.php

Create shortcode: [stylehaat_faq_schema]

Feature:
- Show FAQ accordion on frontend
- Output FAQPage JSON-LD schema for the same questions/answers

Requirements:
- Keep visible FAQ and schema content consistent
- Allow easy editing inside code or shortcode attributes if possible
- Use valid JSON-LD output
- Escape visible output properly
- Sanitize data used in schema
- No external libraries
- Scoped responsive CSS

Do not make false SEO guarantees. Explain how to test visible FAQ and schema output.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

21

Security

এই section-এর promptগুলো Security category-এর practical WordPress/WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

32

SECURITY

Login Attempt Limit Plugin

Use: Brute force login protection-এর basic plugin prompt.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress security plugin developer.

Create a beginner-friendly plugin named "StyleHaat Login Protection".
Folder: stylehaat-login-protection
Main File: stylehaat-login-protection.php

Feature:
Limit failed login attempts for WordPress login page.

Requirements:
- Track failed attempts by IP using transients/options
- Lock IP for a short time after 5 failed attempts
- Show a clean error message when locked
- Admin settings for max attempts and lockout duration
- Use nonce/security for settings
- Sanitize all settings and escape output
- Do not block legitimate admin permanently
- Provide safe reset/disable method

Do not edit WordPress core files. Keep code simple and explain testing carefully on localhost/staging first.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

22

Maintenance

এই section-এর promptগুলো Maintenance category-এর practical WordPress/WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

33

MAINTENANCE

Maintenance Mode / Coming Soon Plugin

Use: Client site update বা launch-এর আগে maintenance page show করার জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Maintenance Mode".
Folder: stylehaat-maintenance-mode
Main File: stylehaat-maintenance-mode.php

Feature:
Show maintenance/coming soon page to visitors when enabled.

Admin settings:
- Enable/disable maintenance mode
- Heading text
- Message text
- Button text/link optional

Requirements:
- Logged-in admins should see the normal website
- Visitors should see maintenance screen
- Use Options API, nonce, sanitize_text_field(), sanitize_textarea_field(), esc_html(), esc_url()
- Clean responsive orange/black design
- Do not affect wp-admin/login
- No external libraries

Explain settings page, testing as logged-out visitor, and how to disable if needed.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

34

MAINTENANCE

Backup Reminder Admin Notice Plugin

Use: Admin কে backup নিতে reminder দেখানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a plugin named "StyleHaat Backup Reminder".
Folder: stylehaat-backup-reminder
Main File: stylehaat-backup-reminder.php

Feature:
Show an admin notice reminding the website owner to take backup before updates/customization.

Requirements:
- Show notice only to administrators
- Add dismiss option for 7 days
- Add settings page to enable/disable reminder
- Message: "Before updating plugins/themes or adding custom code, take a full website backup."
- Use transients/options for dismiss state
- Use nonce, sanitize, escape properly
- Do not affect frontend

No external libraries, no core/theme edits. Explain how to test notice, dismiss, and re-enable.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

23

Developer Utility

এই section-এর promptগুলো Developer Utility category-এর practical WordPress/ WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

35

DEVELOPER UTILITY

Custom Code Snippet Manager Plugin

Use: ছোট CSS/PHP snippet safely manage করার basic plugin idea.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a safe beginner-friendly plugin named "StyleHaat Code Snippet Notes".
Folder: stylehaat-code-snippet-notes
Main File: stylehaat-code-snippet-notes.php

Important:
Do not execute arbitrary PHP code from the database. This plugin is for storing snippet notes only.

Feature:
- Admin menu to save code snippet titles and notes
- Fields: snippet title, code note, where to use, risk level
- Store using WordPress options or custom post type safely
- Display saved notes in admin table
- Admin-only access

Security:
- Nonce check
- Capability check
- Sanitize input
- Escape output

Purpose: help website admins document custom code safely, not run dangerous code. Explain usage and limitations
clearly.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

24

Debugging

এই section-এর promptগুলো Debugging category-এর practical WordPress/WooCommerce plugin feature তৈরির জন্য। প্রতিটি prompt copy-ready এবং Codex-friendly ভাবে লেখা হয়েছে।

36

DEBUGGING

Plugin Debug & Fix Prompt Template

Use: যেকোনো custom plugin error Codex দিয়ে fix করানোর জন্য.

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin debugging expert.

Analyze and fix my custom plugin issue safely.

Plugin Details:
- Plugin Name: [PLUGIN NAME]
- Plugin Folder: [PLUGIN FOLDER]
- Main File: [MAIN FILE]
- Feature: [WHAT THE PLUGIN SHOULD DO]

Problem:
- What I expected: [EXPECTED RESULT]
- What is happening now: [ACTUAL RESULT]
- Error Message: [PASTE FULL ERROR]
- File/Line: [FILE PATH AND LINE NUMBER]
- Recent Changes: [WHAT CHANGED]

Requirements:
- First explain possible cause
- Identify the exact conflicting code/function
- Provide only the fixed section if code is needed
- Do not change unrelated code
- Do not edit WordPress/WooCommerce core or theme files
- Keep WooCommerce cart/checkout/order flow safe
- Give testing checklist and rollback method

Do not rewrite the whole plugin unless necessary.
```

Use Note: এই prompt ব্যবহার করার আগে bracket-এর তথ্য আপনার project অনুযায়ী replace করুন। Codex output approve করার আগে file path, security rule, testing checklist এবং rollback method ভালোভাবে check করুন।

Practice Assignment

এই lesson শেষ করার পর নিচের assignmentগুলো practice করুন। এগুলো real project prompt customize করার জন্য দেওয়া হয়েছে।

Assignment 1
একটি WooCommerce fashion store-এর জন্য Product Badge plugin prompt customize করুন।

Assignment 2
একটি grocery ecommerce store-এর জন্য delivery charge plugin prompt customize করুন।

Assignment 3
একটি digital product store-এর জন্য order/email delivery feature plugin prompt তৈরি করুন।

Assignment 4
একটি shoes ecommerce store-এর জন্য size guide + product FAQ plugin prompt তৈরি করুন।

Assignment 5
নিজের বানানো plugin-এ error হলে Debug Prompt Template ব্যবহার করে fix plan তৈরি করুন।

Main Message: Plugin development prompt দেওয়ার সময় feature requirement, technical method, security rule, testing এবং rollback plan clear করে দিতে হবে। AI/Codex powerful tool, কিন্তু safe instruction না দিলে website break হওয়ার risk থাকে।
