Module 21 - Bonus AI Prompt Library

Lesson 9:
Codex Prompt for WooCommerce Customization

WooCommerce ecommerce website-এ custom feature add করার জন্য copy-ready Codex prompt library.

Focus
WooCommerce customization

Use For
Product, cart, checkout, order, emails

Output
Safe implementation prompt

Best Tool
Codex / AI coding assistant

Designed for students to copy, customize, and use directly in real WordPress/WooCommerce projects.

HOW TO USE THIS PDF

এই PDF কীভাবে ব্যবহার করবেন

এই PDF-এর প্রতিটি prompt WooCommerce website customization-এর জন্য তৈরি। আপনার project অনুযায়ী bracket অংশগুলো replace করে Codex-এ paste করুন। Codex যেসব files edit করবে, testing steps এবং rollback method ভালোভাবে review করুন।

Before You Use a Prompt

- Website backup নিন
- Feature goal clear করুন
- Product/cart/checkout flow বুঝে নিন
- Live site হলে staging/local test করুন

Safety Rules

- WordPress core edit করবেন না
- WooCommerce core edit করবেন না
- Parent theme edit করবেন না
- Cart, checkout, payment, order flow test করুন

Best Prompt Formula:

Role + Website Details + Feature Goal + Requirements + Safety Rules + Testing Checklist + Rollback Plan

PROMPT INDEX

WooCommerce Customization Prompt List

নিচের promptগুলো ecommerce website-এ real-life features add করার জন্য সাজানো হয়েছে। Product page থেকে checkout, order, email, admin report এবং bug fixing পর্যন্ত সব ধরনের common customization এখানে আছে।

01 Master WooCommerce Customization Safety Prompt
02 Buy Now Button for Single Product
03 WhatsApp Product Order Button
04 Floating WhatsApp Icon
05 Product Size Guide / Size Chart
06 Sale Badge / Discount Percentage

32 Product Quantity Rules
33 Product Category Landing Section
34 Product Archive Filter UI
35 Product Search Improvement
36 Low Stock Admin Report
37 WooCommerce Customization Audit
38 WooCommerce Bug Fix Prompt

PROMPT 01

WooCommerce Customization

Master WooCommerce Customization Safety Prompt

সব ধরনের WooCommerce customization শুরু করার আগে

COPY-READY CODEX PROMPT

```
Act as a senior WordPress and WooCommerce developer.

Analyze my WooCommerce website before making any customization.

Website Details:
- Platform: WordPress + WooCommerce + Elementor
- Theme: Hello Elementor
- Website Type: Ecommerce Store
- Customization Needed: [write your feature]

Requirements:
- First analyze the safest implementation method
- Prefer a small custom plugin, child theme, or WPCode where suitable
- Do not edit WordPress core, WooCommerce core, or parent theme files
- Keep cart, checkout, payment, shipping, and order flow safe
- Sanitize input and escape output
- Use scoped CSS only
- Explain files/settings that may change
- Give testing steps and rollback method

After I approve, directly implement the customization.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 02

WooCommerce Customization

Buy Now Button for Single Product

Product page থেকে direct checkout flow তৈরি করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce developer.

Create a safe Buy Now button for WooCommerce single product pages.

Website: WordPress + WooCommerce + Elementor
Theme: Hello Elementor
Goal: Customer clicks Buy Now, product is added to cart, then redirected to checkout.

Requirements:
- Work for simple products
- Work for variable products after variation is selected
- Do not break default Add to Cart button
- Button text: Buy Now
- Style: clean, full width optional, orange/black, responsive
- Prefer a small custom plugin
- Do not edit WooCommerce core, WordPress core, or theme files
- Sanitize and escape properly
- Keep cart, checkout, payment, and order flow safe

After implementation, explain usage, files changed, testing steps, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 03

WooCommerce Customization

WhatsApp Product Order Button

Single product page বা Elementor product template-এ WhatsApp order button যোগ করতে

COPY-READY CODEX PROMPT

```
Act as a senior WordPress and WooCommerce plugin developer.

Create a shortcode-based WhatsApp product order button.

Shortcode: [stylehaat_product_whatsapp]
Use: WooCommerce single product page or Elementor product template.

Requirements:
- Button text: Order on WhatsApp
- Message should include dynamic product title, price if available, and product URL
- WhatsApp number should be editable from an admin/customizer setting
- Open WhatsApp in a new tab
- Use current WooCommerce product data safely
- Show fallback message if used outside product page
- Scoped responsive CSS, orange/black style
- No jQuery, Bootstrap, or external libraries
- Do not edit core/theme files

After implementation, explain shortcode usage and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 04

WooCommerce Customization

Floating WhatsApp Icon

সব পেজে auto floating WhatsApp icon দেখাতে

COPY-READY CODEX PROMPT

```
Act as a senior WordPress plugin developer.

Create a floating WhatsApp icon system for my WordPress/WooCommerce site.

Requirements:
- Show automatically on every frontend page
- Position: bottom right corner
- No shortcode needed
- Click opens WhatsApp chat in a new tab
- WhatsApp number and message should be editable from admin/customizer settings
- Add enable/disable option
- Use a lightweight inline SVG icon, no external library
- Mobile responsive and scoped CSS
- Do not affect cart, checkout, or theme layout
- Do not edit WordPress core, WooCommerce core, or theme files

After implementation, explain settings, testing, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 05

WooCommerce Customization

Product Size Guide / Size Chart

Fashion product page-এ size chart show করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a shortcode-based product size guide system.

Shortcode: [stylehaat_size_guide]

Requirements:
- Show a clean Size Guide table
- Columns: Size, Chest, Length
- Sizes: S, M, L, XL, XXL
- Allow shortcode attributes to customize heading and sizes if possible
- Use on product page, Elementor template, or normal page
- Design: responsive, orange/black, clean table, rounded corners
- Use scoped CSS only
- No external library
- Escape all output
- Do not edit core/theme files

After implementation, explain shortcode usage, example shortcode, and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 06

WooCommerce Customization

Sale Badge / Discount Percentage

Product loop বা single product page-এ dynamic sale badge দেখাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce developer.

Create a WooCommerce sale badge shortcode/system.

Goal: Show dynamic discount percentage for products on sale.

Requirements:
- Shortcode: [stylehaat_sale_badge]
- Use current loop product automatically
- Show “21% OFF” style dynamic percentage when possible
- If percentage cannot be calculated, show “SALE”
- Show nothing for non-sale products
- Support simple products and variable products if possible
- Use scoped CSS only
- Do not create empty space when no sale
- Do not edit WooCommerce core/theme files

After implementation, explain usage and test with sale and non-sale products.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 07

WooCommerce Customization

New Arrival / Best Seller Badge

Product card-এর মধ্যে smart badge দেখাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce customization expert.

Create a dynamic product badge system for my WooCommerce store.

Badge Rules:
- Recently added product: New Arrival
- Featured product: Best Seller
- Sale product: Hot Sale
- Optional custom field support if safe

Requirements:
- Create shortcode: [stylehaat_product_badge]
- Work inside Elementor product loop item if possible
- Show only one or multiple badges based on product condition
- Do not show empty markup if no badge
- Responsive scoped CSS, orange/black style
- Use WooCommerce product functions safely
- Do not edit core/theme files

After implementation, explain badge rules, shortcode usage, and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 08

WooCommerce Customization

Stock & Offer Message

Product page-এ stock এবং offer status message দেখাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce developer.

Create a product stock and offer message shortcode.

Shortcode: [stylehaat_stock_offer_message]

Logic:
- In stock: “In Stock - Ready to Ship”
- Low stock: “Only X left in stock”
- Out of stock: “Out of Stock”
- On sale: “Limited Offer - Save X%”

Requirements:
- Use current WooCommerce product
- Support optional product_id attribute if possible
- Hide empty messages
- Use safe WooCommerce functions
- Scoped responsive CSS
- No core/theme edits
- Do not change inventory/order logic

After implementation, explain how to use and test stock situations.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 09

WooCommerce Customization

Delivery Charge Logic

Bangladesh ecommerce delivery charge setup করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce developer.

Create safe WooCommerce delivery charge logic for a Bangladesh ecommerce store.

Rules:
- Inside Dhaka: ৳60
- Outside Dhaka: ৳120
- Free delivery when cart subtotal is ৳5000 or more

Requirements:
- First recommend whether WooCommerce Shipping Zones can handle this without code
- If custom code is needed, create a small custom plugin
- Do not duplicate shipping charges
- Do not break cart, checkout, payment, or order flow
- Show delivery charge clearly on checkout
- Mobile friendly if UI is added
- Do not edit core/theme files

After implementation, explain settings, testing, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 10

WooCommerce Customization

Free Delivery Progress Bar

Cart/checkout page-এ free delivery motivation দেখাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce conversion developer.

Create a free delivery progress message/bar for cart and checkout.

Rule:
- Free delivery threshold: ৳5000
- If cart subtotal is below threshold, show: “Add ৳X more to get free delivery”
- If threshold reached, show: “You unlocked free delivery!”

Requirements:
- Display on cart and checkout pages
- Use WooCommerce cart subtotal safely
- Do not modify shipping calculation unless already configured
- Responsive design, orange/black style
- Scoped CSS only
- No jQuery or external libraries
- Do not edit core/theme files

After implementation, explain test cases below and above threshold.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 11

WooCommerce Customization

Checkout Field Customization

Checkout form সহজ করতে field remove/relabel করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce checkout customization expert.

Customize my WooCommerce checkout fields safely.

Needed Changes:
- Remove unnecessary company name field
- Make phone field required
- Keep name, phone, address, city/district, and payment fields safe
- Do not remove fields required for shipping/payment

Requirements:
- Use WooCommerce hooks/filters properly
- Prefer a small custom plugin or WPCode snippet
- Do not edit WooCommerce templates/core files
- Keep order data reliable
- Do not break payment, shipping, or order emails
- Add comments in code

After implementation, explain changed fields, how to test checkout, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 12

WooCommerce Customization

Checkout Page Design Improvement

Default checkout page clean ও mobile-friendly করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce UI/UX developer.

Improve my WooCommerce checkout page design safely.

Design Goal:
- Clean card layout
- Better spacing
- Mobile friendly
- No horizontal scroll
- Order summary easy to read
- COD/payment section clear

Requirements:
- Use scoped CSS only for checkout page
- Do not remove or rename checkout fields unless requested
- Do not change payment or shipping logic
- Do not edit WooCommerce core, WordPress core, or theme files
- Keep checkout accessible and responsive
- Test desktop, tablet, and mobile

After implementation, explain CSS/classes changed and checkout testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 13

WooCommerce Customization

Direct Checkout for Landing Page

Facebook ads landing page থেকে fast checkout করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce conversion developer.

Create a direct checkout flow for a landing page product offer.

Product/Offer: [Product Name / Combo Offer]
Goal: Visitor clicks Order Now and goes directly to checkout with the product added.

Requirements:
- Use a shortcode button or URL method
- Add selected product to cart safely
- Redirect to checkout
- Clear old cart only if requested; otherwise explain options
- Support simple product first
- Do not break normal cart/add-to-cart flow
- Keep mobile friendly
- Do not edit core/theme files

After implementation, explain usage, test order flow, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 14

WooCommerce Customization

Thank You Page Design

Order received page premium layout করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce frontend developer.

Improve the WooCommerce Thank You / Order Received page design.

Requirements:
- Use default WooCommerce dynamic order data only
- Do not hardcode order information
- Keep visible: order number, date, email, total, payment method, order details, billing/shipping address
- Add clean card layout, proper spacing, rounded corners, light background
- Mobile friendly and no horizontal scroll
- Scope CSS only to body.woocommerce-order-received
- Do not edit WooCommerce core/theme files
- Do not remove default order details

After implementation, explain testing steps with a test order.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 15

WooCommerce Customization

Custom Order Status

COD order management-এর জন্য custom status add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce order management developer.

Create custom WooCommerce order statuses for a Bangladesh COD ecommerce store.

Statuses:
- Order Confirmed
- Packaging
- Courier Handed Over

Requirements:
- Add statuses safely to WooCommerce admin order status list
- Show in order list/filter/dropdown if possible
- Do not remove default statuses
- Do not auto-change payment/order logic unless requested
- Do not break order emails, payment, or reports
- Prefer a small custom plugin
- Add comments and clean code

After implementation, explain how admin will use statuses and how to test.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 16

WooCommerce Customization

Order Tracking Shortcode

Customer order ID দিয়ে status check করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce plugin developer.

Create a shortcode-based order tracking section.

Shortcode: [stylehaat_track_order]

Requirements:
- Customer enters order ID
- Show order status, date, payment method, total, and item summary
- Hide private address unless user is verified/logged in
- Use nonce, sanitize input, and escape output
- Do not expose sensitive customer data publicly
- Design: card layout, orange/black, responsive
- Do not change order status or payment logic
- Do not edit core/theme files

After implementation, explain privacy behavior, shortcode usage, and test cases.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 17

WooCommerce Customization

Order Admin Notification Box

Admin dashboard/order page-এ helpful alert/notice add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce admin customization developer.

Create an admin notification helper for WooCommerce orders.

Goal:
- Show useful order handling notes in the admin area for new/processing COD orders.

Requirements:
- Add a clean admin notice or order meta box if safe
- Show message only to users with order management permission
- Do not show on frontend
- Do not change order status automatically
- Do not affect payment/shipping/order flow
- Escape output and check capabilities
- Keep code lightweight
- Prefer a small custom plugin

After implementation, explain where the notice appears and how to test it.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 18

WooCommerce Customization

Telegram Order Alert

নতুন order হলে Telegram alert পাঠাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce automation developer.

Create a Telegram new order alert plugin for WooCommerce.

Requirements:
- Add admin settings for Telegram Bot Token and Chat ID
- Send alert when a new order is placed
- Include order ID, total, payment method, customer name, phone, and order status
- Do not expose private data publicly
- Use WordPress HTTP API safely
- Sanitize settings and escape output
- Add nonce security for settings form
- Do not block checkout if Telegram API fails
- Do not edit core/theme files

After implementation, explain setup, testing, privacy, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 19

WooCommerce Customization

Product Tabs Custom Content

Single product page-এ custom tab add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce customization expert.

Add custom tabs to WooCommerce single product pages.

Tabs Needed:
- Size Guide
- Delivery Info
- Return & Exchange
- Product Care

Requirements:
- Use WooCommerce product tabs filter safely
- Keep default tabs unless requested
- Content should be editable from code or simple admin settings if possible
- Responsive design
- Do not edit WooCommerce template files
- Do not break reviews tab
- Escape all output

After implementation, explain where tabs appear and how to test single product pages.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 20

WooCommerce Customization

Product Page Trust Badges

Product page-এ trust signal add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce conversion developer.

Add a trust badge section to WooCommerce single product pages.

Badges:
- Cash on Delivery
- Fast Delivery
- Easy Exchange
- Secure Checkout

Requirements:
- Add section near Add to Cart or product summary area
- Use WooCommerce hooks safely
- Scoped responsive CSS
- Orange/black ecommerce style
- No external icon library; use inline SVG or text icons
- Do not edit theme/WooCommerce core files
- Do not affect cart/checkout flow

After implementation, explain hook used, placement, and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 21

WooCommerce Customization

Product FAQ Accordion

Single product page-এ FAQ accordion add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce frontend developer.

Create a product FAQ accordion section for WooCommerce single product pages.

Requirements:
- Add FAQ section below product summary or tabs
- Use shortcode or WooCommerce hook
- Default FAQs: delivery, size exchange, COD, product quality
- Lightweight vanilla JavaScript if needed
- No jQuery or external libraries
- Accessible accordion buttons
- Scoped responsive CSS
- Do not edit core/theme files

After implementation, explain usage, placement, and mobile testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 22

WooCommerce Customization

Related Products Layout Improvement

Related products section clean করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce frontend developer.

Improve the WooCommerce related products section design safely.

Requirements:
- Keep WooCommerce dynamic related products
- Improve card spacing, product image, title, price, and button style
- Responsive grid for desktop/tablet/mobile
- Do not hardcode products
- Use scoped CSS only
- Do not affect shop/archive product cards unless requested
- Do not edit WooCommerce template/core files

After implementation, explain CSS scope, affected pages, and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 23

WooCommerce Customization

Cart Upsell / Offer Message

Cart page-এ offer বা upsell message দেখাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce conversion developer.

Add a cart offer/upsell message section.

Message Example:
“Add one more T-shirt and save more on delivery.”

Requirements:
- Display on cart page only
- Optionally show different message based on cart subtotal
- Do not force add products automatically
- Do not change cart totals unless requested
- Responsive orange/black card design
- Use WooCommerce hooks safely
- Scoped CSS only
- Do not edit core/theme files

After implementation, explain placement and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 24

WooCommerce Customization

Mini Cart / Floating Cart Button

Mobile user-এর জন্য floating cart shortcut add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce frontend developer.

Create a floating cart button for WooCommerce.

Requirements:
- Show on frontend pages except checkout/order received if safer
- Position bottom corner above WhatsApp if both exist
- Show cart count dynamically
- Link to cart page
- Mobile friendly
- Scoped CSS only
- Do not affect WooCommerce cart fragments incorrectly
- No external libraries
- Do not edit core/theme files

After implementation, explain pages where it appears and how to test cart count updates.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 25

WooCommerce Customization

Variation Swatches Basic

Size/color dropdownকে button style variation option বানাতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce variation UI developer.

Improve variable product option display with a lightweight swatch/button style.

Requirements:
- Target WooCommerce variation attributes such as size and color
- Keep original WooCommerce variation selection working
- Do not break variation price, stock, or add-to-cart logic
- Use CSS and minimal vanilla JS only if necessary
- No external libraries
- Mobile friendly
- Do not edit WooCommerce core/theme files

First analyze the current variation markup, then implement safely. Explain testing for variable products.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 26

WooCommerce Customization

Sticky Add to Cart on Mobile

Mobile product page-এ sticky buy/order action রাখতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce mobile UX developer.

Create a sticky add-to-cart/order bar for WooCommerce single product pages on mobile.

Requirements:
- Show product price and Add to Cart/Buy Now button if safe
- Only show on single product pages
- Do not duplicate broken form submission for variable products
- For variable products, guide user to select options first
- Mobile only, no horizontal scroll
- Scoped CSS and lightweight JS if needed
- Do not edit core/theme files

After implementation, explain behavior for simple and variable products and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 27

WooCommerce Customization

My Account Page Dashboard Cards

Customer account page clean করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce frontend developer.

Improve WooCommerce My Account page design with dashboard cards.

Requirements:
- Keep default WooCommerce account endpoints functional
- Improve dashboard, orders, downloads, addresses, account details navigation
- Add clean card layout with scoped CSS
- Do not remove account functionality
- Do not affect login/register forms unless requested
- Mobile responsive
- Do not edit WooCommerce core/theme files

After implementation, explain pages affected and how to test login, orders, and addresses.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 28

WooCommerce Customization

WooCommerce Email Branding

Order emails design/brand text customize করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce email customization developer.

Customize WooCommerce customer email branding safely.

Requirements:
- Add brand name, support message, and footer note to customer emails
- Keep order details, totals, billing/shipping information unchanged
- Do not break email templates or order data
- Prefer WooCommerce email hooks or settings over template override
- If template override is needed, explain risks first
- Do not edit WooCommerce core files

After implementation, explain emails affected and how to test using a test order.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 29

WooCommerce Customization

COD Confirmation Message

Cash on Delivery order confirmation note add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce COD workflow developer.

Add a Cash on Delivery confirmation message for WooCommerce orders.

Requirements:
- Show message on checkout or thank you page when payment method is COD
- Example: “Our team will call you to confirm your order.”
- Do not change payment method logic
- Do not change order status automatically
- Use WooCommerce hooks safely
- Scoped CSS if frontend message is added
- Do not edit core/theme files

After implementation, explain where the message appears and how to test COD checkout.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 30

WooCommerce Customization

Coupon Auto Apply

Specific offer/landing page coupon auto apply করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce promotion developer.

Create a safe coupon auto-apply system for a campaign.

Requirements:
- Auto apply coupon code: [COUPON_CODE]
- Trigger only from a specific URL parameter or landing page
- Do not apply coupon globally to all users unless requested
- Show a clean success message when coupon is applied
- Do not break cart/checkout totals
- Use WooCommerce coupon functions safely
- Do not edit core/theme files

After implementation, explain URL usage, test cases, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 31

WooCommerce Customization

Minimum Order Amount

Minimum cart total ছাড়া checkout block করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce checkout rules developer.

Create a minimum order amount rule.

Rule:
- Minimum order amount: ৳[AMOUNT]
- If cart subtotal is below minimum, show a clear notice and prevent checkout/order placement.

Requirements:
- Use WooCommerce validation hooks safely
- Show message on cart and checkout
- Do not affect admin orders
- Do not break payment/shipping logic
- Keep message editable if possible
- Do not edit WooCommerce core/theme files

After implementation, explain below-minimum and above-minimum testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 32

WooCommerce Customization

Product Quantity Rules

Minimum/maximum quantity rules add করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce developer.

Create product quantity rules for WooCommerce.

Rules:
- Minimum quantity: [number]
- Maximum quantity: [number]
- Optional: apply only to selected product/category

Requirements:
- Validate quantity on product, cart, and checkout
- Show clear customer notice
- Do not break cart update or checkout flow
- Use WooCommerce hooks safely
- Keep code lightweight and documented
- Do not edit core/theme files

After implementation, explain where rules apply and how to test.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 33

WooCommerce Customization

Product Category Landing Section

Category page-এর উপরে custom content/banner show করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce archive customization developer.

Add a custom category landing section above WooCommerce product category pages.

Requirements:
- Show category-specific title, short description, trust message, and CTA
- Use existing category data if possible
- Optional custom fields only if safe
- Do not hardcode one category unless requested
- Responsive layout
- Scoped CSS only
- Do not edit WooCommerce template/core files

After implementation, explain how content is pulled and how to test category pages.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 34

WooCommerce Customization

Product Archive Filter UI

Shop page filter/sorting area clean করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce shop page UX developer.

Improve the WooCommerce shop/archive filter and sorting UI.

Requirements:
- Keep default product sorting functional
- Improve spacing, label, select field, and mobile layout
- Do not remove WooCommerce hooks unless required
- Use scoped CSS only
- Do not break pagination or product loop
- Do not edit WooCommerce core/theme files

After implementation, explain affected archive pages and testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 35

WooCommerce Customization

Product Search Improvement

Product search form/category search improve করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce search customization developer.

Create an improved product search shortcode.

Shortcode: [stylehaat_product_search]

Requirements:
- Search WooCommerce products only
- Placeholder: Search products...
- Submit button: Search
- Optional category dropdown if safe
- Redirect to WooCommerce search results
- Responsive orange/black design
- Sanitize input and escape output
- Do not edit core/theme files

After implementation, explain shortcode usage and product search testing steps.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 36

WooCommerce Customization

Low Stock Admin Report

Admin area-তে low stock product list দেখতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce admin plugin developer.

Create a simple low stock report admin page.

Requirements:
- Admin menu: Store Reports
- Page: Low Stock Products
- Show product name, SKU, stock quantity, edit link
- Only visible to users with manage_woocommerce capability
- Do not modify stock automatically
- Escape output and check capabilities
- Keep code lightweight
- No external libraries
- Do not edit core/theme files

After implementation, explain how admin can use and test the report.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 37

WooCommerce Customization

WooCommerce Customization Audit

Existing custom code safe কিনা audit করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce code auditor.

Audit my WooCommerce customization before I use it on a live site.

Code/Feature:
[Paste code or describe feature]

Check for:
- WordPress/WooCommerce core edits
- Security issues: nonce, sanitize, escape
- Cart/checkout/order flow risk
- Performance issues
- Mobile/layout risk
- Compatibility with Elementor and Hello Elementor
- Better implementation method
- Testing checklist
- Rollback plan

Do not rewrite everything immediately. First give an audit report and recommended safe fix plan.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

PROMPT 38

WooCommerce Customization

WooCommerce Bug Fix Prompt

Customization করার পর bug fix করতে

COPY-READY CODEX PROMPT

```
Act as a senior WooCommerce bug fixing expert.

Debug my WooCommerce customization issue step by step.

Website Details:
- WordPress + WooCommerce + Elementor
- Theme: Hello Elementor
- Affected Page: [Product / Cart / Checkout / Thank You / My Account]
- Customization Added: [Describe feature/code/plugin]
- Expected Result: [What should happen]
- Actual Result: [What is happening]
- Error Message: [Paste if available]

Requirements:
- Explain possible causes first
- Do not change unrelated code
- Do not edit core/theme files
- Keep order flow safe
- Provide safest fix, testing checklist, and rollback method.
```

আপনার জন্য ব্যবহার নির্দেশনা: prompt-এর bracket অংশগুলো আপনার project অনুযায়ী replace করুন। Codex output দেওয়ার পর files/settings, testing steps এবং rollback method ভালোভাবে পড়ে তারপর implementation approve করুন।

FINAL CHECKLIST

WooCommerce Customization Testing Checklist

যেকোনো customization করার পরে নিচের checklist follow করুন। শুধু feature কাজ করছে কিনা দেখলেই হবে না; পুরো ecommerce order flow test করতে হবে।

Frontend

- Homepage layout ঠিক আছে
- Product page ঠিক আছে
- Mobile view responsive
- No horizontal scroll
- Button/link কাজ করছে

WooCommerce Flow

- Add to cart কাজ করছে
- Cart total ঠিক আছে
- Checkout fields ঠিক আছে
- Payment/shipping দেখাচ্ছে
- Order submit হচ্ছে

Admin & Security

- Admin order আসছে
- Email notification যাচ্ছে
- Input sanitize করা হয়েছে
- Output escape করা হয়েছে
- Rollback method ready

Main Message: WooCommerce customization করার সময় feature add করা যতটা important, cart, checkout, payment, shipping এবং order flow safe রাখা তার থেকেও বেশি important.
